

MC²
Mobile Computer Cart
Making Children Connected

The REF has taken on their largest endeavor to date, a mobile computer cart (MC²) that will be utilized by all teachers and allow them to roll technology right into the classrooms. The cart is capable of storing and recharging 30 wireless laptops, providing access to the internet as well as printers and projectors, and stands as an integral part of what the students are learning by putting the computers right in front of them. Any current funds raised will be attributed to the purchase of this cart for M.J. Ryerson Middle School. A long term goal of the REF is to provide similar technology grants to Hewitt, Cooper and Erskine Schools.

According to The Bergen Record, 99% of NJ classrooms had Internet connections in 2006, and the average child-to-computer ratio was 4 students to 1 computer. The Making Children Connected (MC²) program of the REF will double the computing capacity and capabilities of teachers and students at Ryerson School, by giving an entire classroom access to the mobile computer cart, on a teacher requested basis.
